Interledger

Unlock the future of Open Payments with Interledger

24 hour Hackathon
UCT Graduate School of Business
19-20 October

Our vision is a world where sending payments is as easy as sending an email.

This means transactions are not limited to particular banks, mobile money providers, or borders. The Interleger Foundation strives to be **open, inclusive, and innovative in everything it does,** providing a neutral home for the Interledger Protocol and the Open Payments standards.

Join us in Cape Town on October 19-20 2024 for our annual Interledger Hackathon! Dive into the world of Open Payments and develop innovative solutions using the Interledger Open Payments API.

Prizes up for grabs

First place:
R90 000 cash or cash equivalent in vouchers

Second place:
R50 000 cash or cash equivalent in vouchers

Third place:
R20 000 cash or cash equivalent in vouchers

the value will be split evenly between each member of the team

Register now

Interledger

We're looking for creative solutions that:

Simplify cross-border and cross-currency transactions: Develop tools that make international and multi-currency payments effortless and accessible.

Enhance financial inclusion: Create applications that provide access to essential financial services.

Automate payments and financial workflows: Build solutions to streamline payment processes, reduce friction, and increase efficiency.

What you'll get out of it

Knowledge and skills:
Learn about Open Payments and its value to individuals and businesses. Gain a deeper understanding of the Interledger Open Payments API and how to leverage it to solve real-world problems.

Community and fun:
Get away from the daily grind and have fun with other developers. Make new connections and collaborate in a vibrant environment.

Rewards and recognition:
Get some Interledger swag and a chance to win awesome prizes.

Important Dates

Event registration closes:
4th October, 00:00 SAST

Event kickoff:
Sat 19 October, 13:00 SAST
(the event will run through the night)

Event ends:
Sun 20 October, 16:00 SAST

How we'll help you succeed

Tech onboarding:
Get comfortable using the Interledger Open Payments API

Use case support:
Access detailed use cases to understand typical challenges that can be solved with the Open Payments API.

Expert mentorship:
Receive insights and guidance from the Interledger team to build your best solution.

Ideation sessions:
Participate in a facilitated ideation session if you want help to refine your innovative solutions.
